INSIDE THIS EXHIBITION

"**A**lternately curved or angular, the Madi line unmistakably echoes the rhythmic and abstract spirit of Islamic art. The images are not by any means abstract, but their strength derives essentially from a structural foundation shaped by abstract considerations rooted in universal concepts. Madi a lover of nature, is a devout Muslim who believes the God created everything through careful calculation of the measures of scale, position, form and color (or light and shade), and that every single unit in the universe is defined and repeated according to these four qualities.

He says that when he picks up a simple weed and examines it closely, he sees the evidence of God universal order, in which everything is different and yet composed of the same cosmic elements."
